|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CENSUS COUNTRY SATURATION</b>                  | Estimated percentage of renter-occupied units versus owner-occupied units as reported by U.S. Census / American Community Survey within the geography searched. Census estimates rental saturation for 1-4 unit properties and rental saturation for 5+ unit properties. The most recent Census data is from at least 21 months ago.                                                                                                                                                                                                                    |
| <b>CONFIDENCE SCORE</b>                           | The confidence score of a valuation is derived from FSD (Forecast Standard Deviation) and indicates the level of accuracy in the AVM estimate. For example, suppose the rent AVM estimate is \$1,000 and the corresponding confidence score is 95. In that case, there is a 68 percent probability that the actual market rent will fall between +/-5 percent around the rent AVM estimate, i.e. between \$950 and \$1,050. The higher the confidence score, the smaller the prediction error and the more confidence we have in the rent AVM estimate. |
| <b>CUSTOM COUNTY SATURATION</b>                   | Estimated percentage of renter-occupied units versus owner-occupied units as reported by RentRange within the geography searched. RentRange estimates rental saturation for single-family detached properties only.                                                                                                                                                                                                                                                                                                                                     |
| <b>CUSTOM COUNTY VACANCY</b>                      | Estimated vacancy rate as reported by RentRange uses both public and proprietary information within the geography searched. Custom vacancy is for either single-family detached or multi-family depending on the report type.                                                                                                                                                                                                                                                                                                                           |
| <b>DAYS ON MARKET</b>                             | Days on market measures the average number of days the property has been listed for rent in that geography.                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>DAYS ON MARKET VS. VACANCY CHART IN COUNTY</b> | Left Y axis shows days on market represented by bars, the right Y axis and curve line represent vacancy rate in the given county.                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>ESTIMATED PROPERTY VACANCY</b>                 | RentRange's Estimated Property Vacancy is built from our proprietary aggregated analysis of geographic and property specific trends in each subject property's local area.                                                                                                                                                                                                                                                                                                                                                                              |
| <b>GROSS LIVING AREA (GLA)</b>                    | Gross Living Area (GLA) is the total area of finished, above-grade residential space. It is calculated by measuring the outside perimeter of the structure and includes only finished, habitable, above-grade living space. Finished basements and unfinished attic areas are not included in total gross living area.                                                                                                                                                                                                                                  |
| <b>GROSS YIELD</b>                                | Gross yield is calculated by dividing the total annual projected gross income by the total property price. $\text{Gross yield} = \text{gross income} / \text{total property price}$                                                                                                                                                                                                                                                                                                                                                                     |

| METROPOLITAN STATISTICAL AREA (MSA) | Metropolitan statistical areas are geographic entities delineated by the Office of Management and Budget (OMB) for use by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics. A metro area contains a core urban area of 50,000 or more population. Each metro area consists of one or more counties and includes the counties containing the core urban area, as well as any adjacent counties that have a high degree of social and economic integration (as measured by commuting to work) with the urban core.
